

## AERVOE INDUSTRIES LIVESTOCK MARKING PROGRAM

### AERVOE MARKING DYE VS. PRIMA TECH

-The Aervoe Marking Dye is packaged in a 20oz can with a 15oz net weight. Prima Tech is also in a 20oz can but with a 12oz net weight. That relates to 25% more product in the can which means 25% more linear footage and quick shots.

-The Prima Tech product has a paper label on the can which will absorb bacteria. Aervoe only uses film labels. Also each label display descriptions and GHS information in trilingual language. VOC & MIR requirements are also displayed on the label. All cases also include a SDS Form.

-Each Aervoe product is given a Batch # which shows part number, production date and assembly line used. Retains for each batch are stored for future reference.

-Non-Clogging Any-Way Spray Valve

-Lead Free---VOC & MIR Compliant

-MADE IN THE USA
