

Fan Spacing Rule of Thumb

Fan Sizing Rule of Thumb

- 12' Fan covers approximately a 30' area.
- 14' Fan covers approximately a 30'-40' area.
- 18' Fan covers approximately a 40'-50' area.
- 20' Fan covers approximately a 50'-60' area.
- 24' Fan covers approximately a 60'-70' area.

Guy Wire Requirements

- Use Guy Wires when using any swivel mounts.
- Use Guy Wires when using drop pipe extensions of 24" or longer.

Fan Blade Clearances

- 20'-24' Fans need 4' of air inlet above the fan blades for full speed efficiency.
- 12'-18' Fans need 2' of air inlet above the fan blades for full speed efficiency.
