

Welcome to the next generation of ventilation!

# ENERGY SAVING INDUSTRIAL CEILING FANS

VES Environmental Solutions, LLC. is North America's most innovative environmental company. Our components are designed to cover all aspects of a good ventilation system. With today's high heating and cooling cost you need to find a way to reduce your energy bills and provide an ideal environment for workers. Our Energy Saving Industrial Ceiling Fan Series is the most cost effective way to move large volumes of air in any building that has ceilings exceeding 15 feet. In the winter time, hot air rises and is trapped at the ceiling level. Ceiling fans gently push this hot air down keeps the floor level of the building warmer. By recovering the warm air, you lose less heat out through the roof and your heaters turn on less. This saves you money and provides a better environment to raise productivity. In the summer time, turn the fans on medium to high speed and you create a constant building temperature and a breeze to cool employees, machinery and equipment.

INDB564L

## APPLICATIONS

- Over shipping doors to create an air curtain. This reduces the amount of cool air coming into the building in the winter and hot air in the summer.
- All models are ideal for factories, warehouses, retail stores and garages
- The MR Series is Moisture Resistant and high performance is ideal agricultural, greenhouse and high moisture application.
- Heat de-stratification.
- Insect control with air velocity over 250 feet per minute.
- Air curtain for shipping doors
- Employee, machine and compressor cooling
- By removing hot air from the ceiling you can increase

INDC60ODP

light and ballast life

## FEATURES

- Sealed bearings so no maintenance required.
- Extra 24" lead wires coming out of fan for easy adapting to longer downrods.
- 24" stainless steel safety cable.
- Low energy consumption maintenance free motors
- 18" standard downrod length
- Painted aluminum blades
- MR series has Moisture Resistant motors
- Quiet operation
- UL/ULC approved
- 5 Year Warranty

INDA484L

## CONTROLS

We have a full range of variable speed controls designed for both downdraft and forward/reverse applications. All controls have a minimum speed adjustment so you can set the ideal speed based on your application and ceiling height. Our controls are packaged with knobs, cover plate and hardware to attach to standard electrical boxes.

Contact us for our complete line of ventilation products including exhaust fans, temperature controls, lighting, curtain inlet and walls, cooling, polycarbonate panels, gates, headlocks, stalls, steel and rubber flooring.
