

# Super Flo Fan

50" Fiberglass Panel Circulation

**FARMER BOY®**

 **ARCTIC AIR®**

Arctic Air Super Flo Circulation Fans lead the dairy industry in both power and efficiency. The bell-shape design and balanced exhaust opening allows for maximum air velocity and coverage. The lightweight fiberglass construction makes it easier to handle and withstands the harshest environments. The state-of-the-art blade design is built for performance, durability, and optimal air throw and coverage. This multi-purpose fan is ideal in agricultural and industrial use, to maintain consistent temperatures and to dry surfaces.

## FEATURES

- Fiberglass corrosion-resistant housing
- Belt Drive Motors (included, but needs mounted)
- Motors are totally enclosed, high efficiency with sealed ball bearing
- Most powerful fans on the market today based on size and motor horsepower
- Well-balanced and strong blade design for years of trouble free service
- Designed for optimum air throw and coverage
- Easy to clean and has no corners for dirt and disease build-up
- Reduces heating/cooling bills up to 35% with air de-stratification
- Creates a consistent air temperature in buildings or greenhouses
- 3 Year Manufacturer's Motor Warranty
