Maximum Extension Length (at motor end of first system)	300	240	180	180	180*

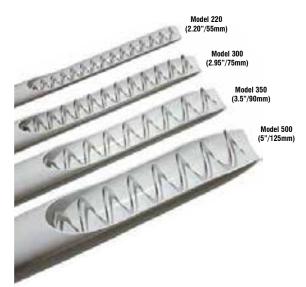

<sup>\*</sup>For high moisture corn, reduce system length by 50%.

#### **Unloader Systems**

These are available in single, twin, tandem and twin tandem models. Augers can be direct or belt driven by a 1/3 to 1-1/2 horsepower, totally enclosed fan cooled motor at a standard 358 RPM (other speeds are available for special applications). Additional accessories are available including extension systems to adjust auger lengths, time clocks, automatic shut-off switches, intermediate drop kits, and y-drops.

Tubing and augers are available in four sizes and five models to fit your specific requirements. Whether it's ground feed, crumble feed, mash, high moisture corn, shelled corn or pellets, GSI has the combinations to handle it.

Is the bottom of your tank rusting out? Hopper extension kits allow you to replace the bottom of the hopper section instead of replacing the entire tank.
