

# FOAM . . .

## THE ONLY WAY TO CLEAN!

- Gives you a cleaner barn.
- Reduces water usage.
- Reduces labor.

### Three easy steps to cleaning your barn:

#### 1. PRE - WET

Begin by wetting the barn walls, equipment, etc. approximately 2-3 minutes.

#### 2. FOAM - IT

Foam **EZ CLEAN** (using 8oz tip) throughout the barn including the ceilings and walls. Our specially formulated cleaner is designed to remove greasy film, fatty residues, and compacted soils found in farrowing, nursery, and finishing units. After foaming **EZ CLEAN** let the foam set for 15 to 20 minutes, then wash off in a consistent pattern. This will assure removal of fatty residues, and greasy films from gating, feeders, and flooring. **By cleaning with foam your barn will be cleaner than ever before.**

#### 3. SANITIZE

To disinfect properly, the surface of the barn must be as clean as possible that is why it is necessary to use **EZ CLEAN**. The same EZ Foamer is used to foam on your **QUAT DISINFECTANT 200** (using 1oz tip). This is a powerful disinfectant designed so you can clearly see where you have applied and have not applied the disinfectant. It is important to have visual identification so that no areas are missed. Also, foam increases the kill rate of your disinfectant because the disinfectant has a longer time to work on the contaminated areas.

# EZ CLEAN AG

## DESCRIPTION

**EZ CLEAN AG** is a high-foaming chlorinated alkaline cleaner designed for use in the swine, poultry, various agricultural and food processing industries. Removal of a wide variety of organic soils is swift and complete. **EZ CLEAN AG** rinses quickly leaves no hard water films and is biodegradable.

## USE INSTRUCTIONS

**EZ CLEAN AG** was designed to be used through proper foaming equipment, or as a soak cleaner for miscellaneous parts and equipment. Dilution rates will vary based on soil loads and use conditions. Typically this product should be used @ 5 - 8 oz per gallon, or as instructed by your local representative. A thorough pre-rinse to remove loose extraneous debris prior to foaming is recommended. Apply a blanket of foam over area to be cleaned and allow @ 15 - 20 minutes contact. Do not allow foam to dry on surface. Keep room moist. Thoroughly rinse.

## PHYSICAL CHARACTERISTICS

Color . . . . . a clear to pale yellow solution

Foam . . . . . high foaming

Rinses quickly and easily

Biodegradable

Moderate alkalinity

## SAFETY

**EZ CLEAN AG** is a chlorinated alkaline solution. Please use all appropriate safety equipment (PPE) to prevent skin and eye contact. SEE MSDS or contact your local representative for further information.

## CONTAINERS

This product is available in multiple package sizes (5 or 55 gallons). Please contact your local representative for available packaging in your area.

## PRODUCT DATA SHEET

All information is offered in good faith and is believed to be reasonable correct. Conditions of use are beyond our control and all risk of use are assumed by the user. User should establish the correct concentration for specific needs.
