

By scatter or by spray, there's protection from what comes knocking, crawling, or flying...

EXHALT™ WDG INSECT GROWTH REGULATOR CLOSSES THE DOOR ON UNWANTED INTRUDERS

Featuring two modes of application, Exhalt™ WDG Insect Growth Regulator, as a dry granule or coarse spray is designed to protect livestock by interrupting the life cycles of labeled pests such as house flies, stable flies,* dump flies, and soldier flies as well as darkling beetles, crickets, and German cockroach nymphs (indoors). It is approved for use in and around poultry, cattle, equine, and swine operations, as well as other commercial facilities.**

*Granular application only.
**Not for use in California.

FIRST-CHOICE PROTECTION WITH TWO MODES OF APPLICATION

Help control house flies, stable flies,* dump flies, and soldier flies as well as darkling beetles, crickets, and German cockroach nymphs (indoors) that develop in livestock facilities including dairy and beef, poultry, swine, equine, and other rural premises. Featuring two methods of application, Exhalt™ WDG Insect Growth Regulator has been formulated to help you achieve a higher level of pest control in and around your operation through a gradual reduction in the population by interrupting the life cycles of various insects that cause your operation problems.

*Granular application only.

FEATURES:

- The active ingredient Novaluron
- Insect growth regulator
- Dry granular application
- Coarse spray application
- Tank-mix ability

DOSAGE:

- Varies by application site and application method

BENEFITS:

- Provides control by causing a gradual reduction in the population by interrupting the life cycles of labeled pests
- The elimination of adult insects occurs gradually and becomes visible 1-2 weeks after application
- Used in and around livestock facilities,** including cattle barns,** swine houses,** horse barns,** livestock manure,** non-farm animal stalls,** cage-layer houses, poultry houses, as well as commercial buildings,** structures,** and their immediate surroundings,** and on modes of transport,** including non-food/non-feed areas of stores,** warehouses,** transportation equipment,** manufacturing sites,** industrial buildings,** trucks,** and trailers**

**Not for use in California.

APPLICATION METHODS:

DRY GRANULAR- While wearing gloves, scatter Exhalt™ WDG Insect Growth Regulator directly and evenly over cricket, German cockroach nymph (indoors only), litter beetle, house fly, dark-eyed fruit fly, dump fly, stable fly, and soldier fly breeding sites. Spread by hand or with a mechanized spreader. Do not allow granules to accumulate in piles.

COARSE SPRAY- While wearing gloves, partially fill tank with water, add Exhalt™ WDG Insect Growth Regulator in the correct amount from the label tables, agitate, and fill to final volume with water. Agitate before spraying to ensure mixture is thoroughly dissolved. Do not let mixture stand overnight.

IN COMBINATION WITH AN ADULTICIDE- Exhalt™ WDG Insect Growth Regulator may be combined or tank-mixed and applied as a coarse spray with an EPA-registered insecticide for control of adult populations of crickets, litter beetles, house flies, dark-eyed fruit flies, dump flies, and soldier flies where labeled. The combination of an adulticide and Exhalt™ WDG Insect Growth Regulator will provide immediate control of adult crickets, house flies, dark-eyed fruit flies, soldier flies, dump flies, and litter beetles, while inhibiting the immature stages of listed pests from developing into adults. The more restrictive label will apply when tank-mixing. Use Exhalt™ WDG Insect Growth Regulator only at specified rates.

	GRANULE PER 1,000 SQ FT	LIQUID PER 1,000 SQ FT
CATTLE/HOG/HORSE FARM	1/2 pound	4 to 8 oz
BROILER HOUSE	1/16 to 1 pound	8 oz
LAYER HOUSE	1 pound	4 to 36 oz***

***Depending on pest and application site.
