

# FARMER BOY®

## ORGANIC

HELPING YOUR BIRDS  
BE MORE NEIGHBORLY

Our Organic PeckAway is a useful tool that is designed to be safely pecked by the birds to help divert the instinctive behaviors of feather pecking. The product is dispersed throughout the house in areas where birds freely roam. PeckAway is made up of materials that are natural and safe for birds to consume. The primary ingredients are grit, salt, and calcium. The birds find flavor and enjoyment in working to break up the stones over time.

### DIRECTIONS

The ideal way to display PeckAway for your birds is to utilize a 5 gallon pail as shown in the photo.

Depending on the nature of the flock, disperse one PeckAway stone per 400 to 800 birds.

### WHAT MAKES PECKAWAY DIFFERENT?

- The ingredients are complementary to the diet. PeckAway contains no wheat bran, sunflower seeds, sulfates etc.
- Our PeckAway stone is lighter than others yet lasts longer.
- The stones weigh about 12 pounds each and are designed to be easily handled as they are shaped like a large donut.

### PECKAWAY HELPS PROMOTE

- Healthy Activities To Occupy Time
- Natural Beak Wear
- Normal Feed Consumption
- Less injuries
- Decreased mortality
