

Manual Override Box

Model: MOB-4

Increase the load handling capacity of your control's relays

The Manual Override Box increases the load handling capability of your control's relays and provides an external disconnect. The MOB-4 includes four 240 V power contactor relays with AUTO-OFF-MANUAL switches and snubber filters. If you need to override an actuator or curtain machine, an actuator override kit is available.

Features

- Heavy-duty 240 V power contactor relays
- AUTO-OFF-MANUAL switches
- NEMA 4X enclosure (corrosion resistant, water resistant, and fire retardant)
- CSA approval
- Limited warranty (90 days)

Electrical ratings

Coil

10.2 mA at 240 VAC

Contact

25 A at 240 VAC; resistive 3.0
1 HP at 120 VAC, 2 HP at 240 VAC; motor, power factor 0.4
1300 W at 120 VAC; tungsten

Accessories

Actuator override kit

KMOB-4-ACTUATOR adapts two of the switch and relay pairs to manually open and close actuators or curtain machines.

Power contactor

PC-240 is a replacement power contactor.

Snubber filter

127-0 is a replacement snubber filter. Snubber filters help extend the life of relay contacts by absorbing electrical noise.
