

# ASI PitSlammers™

ASI Pit Slammers are designed to slip into the slatted floors of deep and shallow pit buildings. ASI Pit Slammers now available in an easy to use time release block.

ASI's scientifically researched time release formulation digests organic wastes naturally and effectively:

- \* Reduce pit crusting
- \* Reduce odor causing components
- \* Reduce ammonia and hydrogen sulfide
- \* Liquefy solids for easier and more efficient pump outs
- \* Application immediately after pump out can reduce the chance of foaming manure
- \* Allow for consistent treatment in pits and lagoons.

Our unique bacterial cultures are selected for optimum enzyme production, assuring the efficient breakdown of proteins, carbohydrates, and fats. This proprietary blend of microbes will reduce odors, BOD, COD, suspended solids, turbidity, and ammonia concentrations in Lagoons and Pits.

ASI's unique, non-engineered cultures rapidly digest odor causing organic wastes and liquefy solids.

The new easy to use AI Pit Slammers™ makes it possible to get consistent time release of bacteria all over the floor of the pit buildings. Bacteria is released from the bottom up to help liquefy the sludge throughout the manure profile.

## APPLICATIONS :

Waste Lagoons, Pit Storage, Flush Tanks, Lift Stations.

1 Pit Slammer™ treats 25000 gallons of waste. Drop between slatted floors consistently to get good coverage all along the bottom of the pit. ASI Pit Slammers will disperse all bacteria within 30 - 45 days. ASI Pit Slammers may be used in conjunction with other ASI Product brands for maximum treatment potential.

**NET CONTENT & WEIGHT:**  
200 gram blocks / 16 blocks per case

## Product Profile: Multiple *Bacillus* Species

- \* Naturally occurring, non-engineered
- \* Facultative anaerobes
- \* Highly motile
- \* Positive chemotaxis
- \* 100% stabilized bacterial spores

**KEEP OUT OF REACH OF  
CHILDREN.**

**SAFE TO USE - ALL NATURAL**
