

The all-new **SUNBIRD**[®] Modular Enclosure

The Pinnacle of Poultry Lighting Performance

- Plug in up to 6 Drivers (No tools required)
- Each Driver can power up to 22 x 10W Sunbird lights
- Link multiple enclosures together
- Dim unlimited lights from a single dimmer
- LED Indicators for Supply, Load and Fault identification:

- » *Is main power on?*
- » *Are all the Drivers on?*
- » *Is repeater getting power?*
- » *Is power going out of the repeater?*
- » *Is there an over temperature related shut down?*
- » *Is there a short circuit related shut down?*

- Most of the fault-finding work will be done by this enclosure thereby reducing maintenance and down time
- Simple installation using two fixing points
- Enclosure plugs into a standard 15Amp plug point meaning that no COC is required for installation
- Compact design
- Robust construction with Powder Coated 3mm Aluminium and Tempered Glass door
- Built-in Dimmer and new Repeater module including:

- » *30 Amp Load capacity (Repeater)*
- » *Soldered terminals for supply and load connections*
- » *External connector plates with threaded terminals, ring lugs and wing nuts*
- » *Integrated alarm output should lights go off unintentionally*
- » *Over temperature protected*
- » *Short circuit protected*
- » *Options for remote Dimmer installation*
